## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1-21, drawn to the process for making a molded article having a granular or speckled appearance, classified in class 264, subclass 073.
  - II. Claim 22-33, drawn to a molded article having a granular or speckled appearance with contrasting color properties, classified in class 106, subclass 228.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed in Group II, i.e. a molded article having granular or speckled appearance with contrasting color properties and substantially similar physical properties, can be produced by another materially different process such as addition of heterogeneous materials or other additives such as metal particles to a polymer to achieve granular form.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
